

Profiler-Reported GPU Efficiency for WSClean + IDG

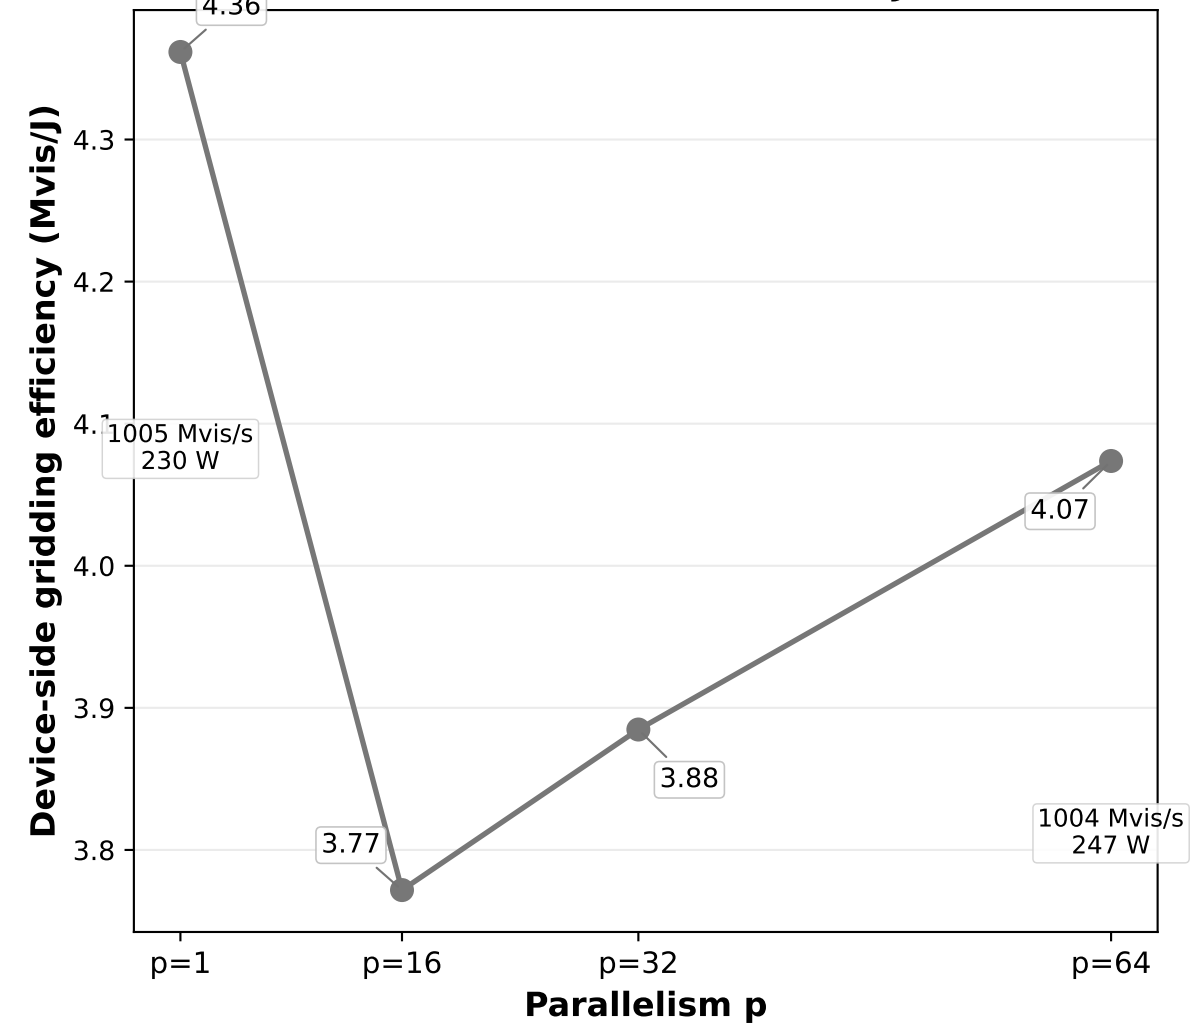

Profiler-reported data movement efficiency (GB/J)

Stage-Level GB/J

Device-side gridding efficiency (Mvis/J)

End-to-End Device Mvis/J

aridder sub-fft aridder + sub-fft

Left: `gridder`, `sub-fft`, and their combined total use the representative `|stage:` lines with GB/J computed from bytes = (GB/s x time) and energy = power x time.
Right: `|device:` and `|gridding:` are paired to compute device-side Mvis/J. These are profiler-derived efficiency views, not full-system energy metrics.
